# About GRN UK

## Our Purpose

At GRN we want everyone to have the opportunity to hear the good news of Jesus in their own heart language.

We prioritise languages that:

1. Do not yet have the Bible or other Christian materials accessible in their language, and/or
2. Have many oral communicators who can't make good use of printed materials (2/3 of the world's population).

## Our Strategy

GRN produces culturally appropriate audio recordings of Bible stories, basic Bible teaching and Bible portions using indigenous voices and music. We also produce visual materials such as picture books and videos.

We make the recordings available on our websites and 5fish apps for free listening, downloading and distribution (see over for details).

We produce and distribute specialised playback equipment for use in communities without electricity and batteries.

We partner with churches and mission societies in the UK and around the world to get the gospel to those who need it most. No tribe is too small, no language is too obscure, no village is too remote.

## Why do we use Audio?

- Hearing the "message from God" in one's own language or dialect doesn't feel foreign, but is personal and powerful.
- Many communities are oral societies where few read. Their language may not even be written down. But they can listen, and often like to listen together in groups.
- Audio recordings can be listened to repeatedly to assist understanding.
- Audio recordings can be freely downloaded online and easily distributed via CD, microSD cards, Bluetooth and other media.
- Audio recordings can be effectively used in countries with restricted access.
- Audio recordings can be produced in just months while a Bible may take many years.

**We place a high value on story telling — just like Jesus did. Story telling is an effective way to communicate the good news, especially to groups without a written language or to those with an oral tradition.**
